

SAF-T-LINER®
EFX2

TYPE D DESIGN AND PERFORMANCE—ENHANCED FOR TOMORROW.

Introducing the Saf-T-Liner® EFX2.

The EFX2 builds on the proven innovations of our industry-leading Saf-T-Liner® C2, delivering a Type D bus with an even stronger body construction that's easier to maintain.

We're committed to advancing the standards of Type D school bus design — and the EFX2 is ready to lead the way.

Engineered with all the best design features from our C2.

The enhanced EFX2 sets a new standard for Type D school buses while incorporating the top design elements of the C2:

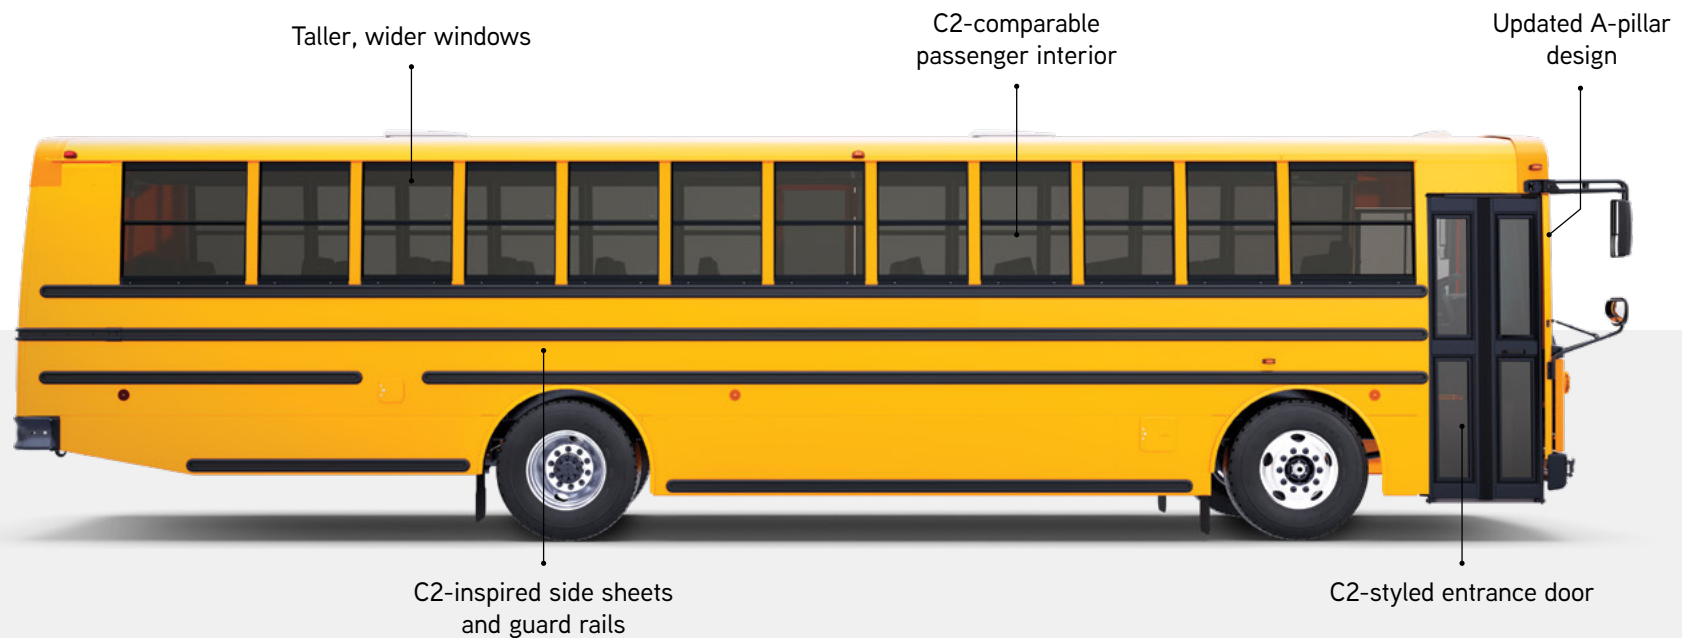

- **Saf-T-Net construction** reinforces the bus frame for added durability and passenger protection
- **Advanced adhesives** strengthen the EFX2's structure for long-term reliability
- **Automated paint application** provides a resilient finish that withstands daily wear
- **Simplified wiring** makes electrical maintenance faster and more efficient

Our unified parts platform keeps maintenance and ownership simple.

The EFX2 shares key design elements with the C2. This common parts platform can help school bus fleets reduce costs and minimize the number of unique parts dealers and customers need to stock.

Your next Type D bus should be built for tomorrow.

The EFX2 is built to power efficient fleets today — and it's ready for the future, too. With Thomas Built, you get a Type D bus that's designed to work seamlessly with the latest technology while staying ready for what's next.
